(54) ABBREVIATED DIAL REREGISTERING SYSTEM

(57)Abstract:

PURPOSE: To use abbreviated dial service without reregistering the abbreviated dial by modifying automatically the abbreviated dial registration list of a private exchange system when an extension telephone number is changed.

CONSTITUTION: An old extension telephone number and a new extension telephone number are inputted by an extension telephone number change command from a maintenance console 1 and the inputted information passes through a central processing control unit 2 and is written into the extension telephone number change list of a storage device 3. Next, the same number as the old extension telephone number in the extension telephone number is found by the extension telephone number in the abbreviated dial registration list, the new extension telephone number is written and next, the new extension telephone number and the old extension telephone number in the extension telephone number change list are erased. Thus, the abbreviated dial service can be used without reregistering the abbreviated dial.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
